Novel developments and findings in cell biology, genetics and endocrinology have greatly increased the knowledge on mechanism which regulates oogenesis and folliculogenesis, offering useful tools in assisted reproduction practice.

The “Tecnobios Procreazione Symposium 2010” will provide participants with a comprehensive overview of the most relevant issues in basic and applied reproductive biology and medicine.

The presence of renowned international speakers will offer an opportunity to focus on state of the art in oocyte cryopreservation procedures, identification of new markers for selection of the best oocytes and embryos, reproductive organ surgery, ovarian stimulation and cell culture conditions improvement.
